About

Passionate Full-Stack Developer and entrepreneur with a blend of corporate and startup experience. Bringing 6 months of backend engineering experience from HighRadius, complemented by a demonstrated ability to build products from scratch—most notably winning the Startup Grind 2025 and placing 3rd at the IIT Bhubaneswar Startup Competition. Adept at bridging the gap between technical execution and business logic, with hands-on expertise in Web Development, Database Management, and Power BI.

Technical Skills

- Front-end Development
- Back-end Development
- SQL Server
- Software Documentation
- Power BI
- Data Analytics
- Framework Development
- Database Management

Professional Experience

HighRadius | Remote — Backend Developer Intern

Completed a competitive 6-month paid internship focused on backend development for enterprise SaaS solutions.

Developed and optimized RESTful APIs and managed database interactions to ensure high-performance data processing.

Collaborated with cross-functional teams to debug complex issues and implemented scalable code in a Java/Cloud environment.

Projects

NEXTINCAMPUS — Leading product development of a professional platform with CV filtering, mentorship & dashboard features

Inventory Management System — Full-stack DBMS project using React, Node.js, and Java
